

WE AUTOMATE THINGS

Where Comfort Meets Control.

At SmarDen, we believe your home should respond to you not the other way around.
Our mission is simple: to make intelligent living effortless, elegant, and dependable.

We design automation that fits your lifestyle, enhances your space, and works silently
in the background so you can focus on what truly matters.

Smart doesn't have to be complicated. It just has to be thoughtful.

Built on Trust

With **thousands of homes automated** and a growing family of trusted partners, SmarDen is not just a product, it's a promise.

Designed for Life

Empowering Designers, Architects & Distributors.

SmarDen empowers creators and collaborators to deliver future-ready spaces.
Whether you're designing a dream home or expanding your portfolio, we provide:

Customizable Solutions | Dedicated Partner Support | Fast Turnarounds & Training
White-Label Options | Deep Integration Capabilities

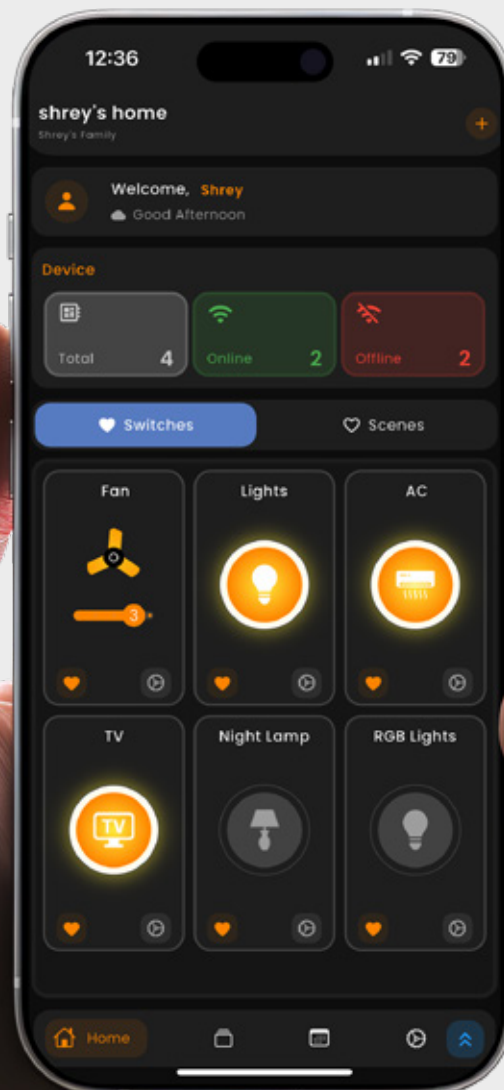

Together, let's build homes that inspire and endure.

Because you don't just live here.
YOU THRIVE HERE.

Smart Home Control For smart individuals

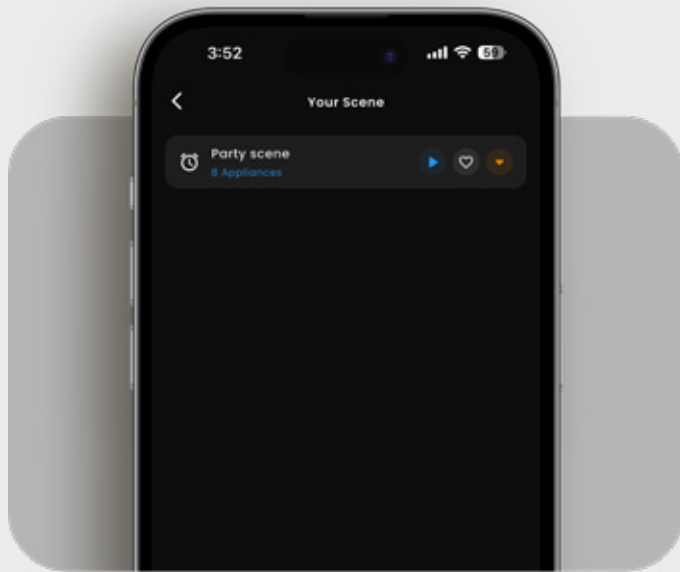

With advanced smart home control technology, you can effortlessly perform tasks like switching, dimming, scenes, control blinds and shutters, temperature control, timing, security and more.

YOUR SMART HOME APP

It is a comprehensive home automation control center that provides seamless management of all connected smart devices through a single interface.

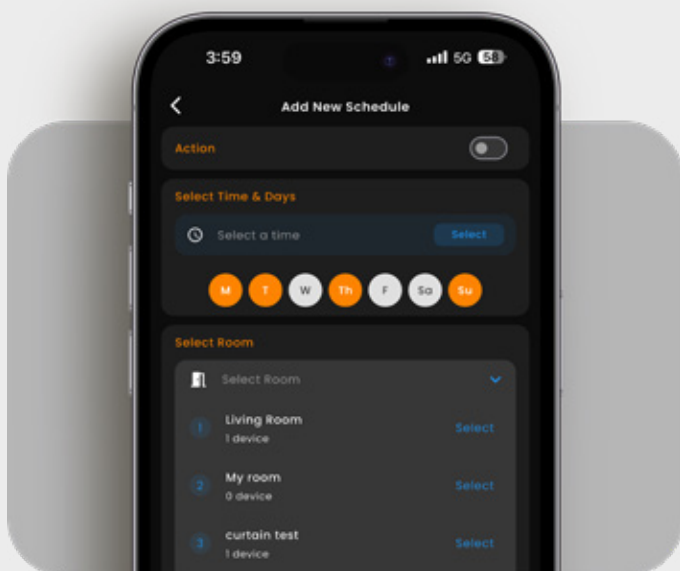

The app enables users to control lights, fans, air conditioners, and other appliances remotely from anywhere in the world

VOICE CONTROL

Imagine controlling your entire home with just your voice. Turn lights on as you walk in, adjust the perfect temperature, or set the mood for movie night, all without touching a single switch.

This intuitive technology understands natural speech, making home control as easy as having a conversation. Whether you're cooking, working, or relaxing, your home responds to your voice, executing commands instantly and precisely.

Smart Features

- Seamless Control: Manage entertainment systems, appliances, and security devices without lifting a finger
- Customized Routines: Create personalized commands that trigger multiple actions simultaneously
- Multi-Room Control: Coordinate devices across different rooms with a single command
- Intelligent Responses: Get instant feedback and status updates on your home's systems

Practical Benefits

- Accessibility: Perfect for elderly or mobility-impaired individuals
- Convenience: Control your home environment while multitasking

S M A R T T O U C H S W I T C H E S

Smart touch switch boards are modern, intuitive devices that offer seamless control over your home's lighting and electrical systems. Unlike traditional switches, these boards feature touch-sensitive surfaces, allowing users to operate lights, fans, and other appliances with a simple tap or swipe. Often integrated with Wi-Fi or Bluetooth technology, they can be controlled remotely via smartphones or voice assistants like Alexa or Google Assistant.

Smart Touch Switches

Smart touch switches are modern, touch-sensitive devices that replace traditional wall switches to control lights, fans, and other home appliances.

App Control

Voice Control

Custom Icons and Vibrant Colors

HIGHLIGHTS

Control Options:

- App control functionality for remote operation
- Voice control compatibility for hands-free use
- Touch-sensitive panel for direct manual control
- Smart Features:
 - WiFi connectivity for remote access
 - Multiple touch points for controlling different devices
 - LED indicators for visual feedback
 - Customizable settings through smartphone app

User Experience:

- Responsive touch interface
- Intuitive control layout
- Backlit display for nighttime visibility
- Clean, contemporary aesthetic that enhances interior design

Technical Specifications

- Operating Voltage: 230 V AC
- Technology: Cap Sense 1 Million Touch capacity
- Load: 6 AMP Load Max current per load
- Operating environment Temperature: 0 to 45 C Ambient
- Operating Humidity: 5% to 90% RH
- Load Type: CFL, LED Light, Tube Light, Resistive Load, Wired incandescent Lighting
- Heavy: 16AMP for Air conditioner, water geyser

Installation & Compatibility:

- Standard wall mounting
- Compatible with existing electrical systems
- No additional hub required
- Works with major smart home ecosystems

Safety & Reliability:

- Shock-proof operation
- Child safety features
- Durable glass panel construction
- Stable wireless connection

Colors & Customizations

Face Plate

- Choose from vibrant colors like- Gold, grey, white, black and Royal blue

Borders

- You can choose the color of the border that match your style like- black, chrome, gold and rose gold

Custom Icons

- Make the Touch Switches really yours by choosing custom icons according to your appliances

SMART DOOR LOCKS

Smart door locks represent a revolutionary advancement in home security, combining traditional locking mechanisms with digital technology.

These devices replace conventional key-based locks with sophisticated systems that offer multiple access methods including fingerprint scanning, PIN codes, RFID cards, and smartphone control.

HIGHLIGHTS

Access Methods:

- Fingerprint recognition
- PIN code entry
- Smartphone control
- RFID card compatibility
- Physical key backup

Smart Features:

- Remote locking/unlocking via app
- Real-time access notifications
- Entry log tracking
- Temporary access codes
- Auto-lock functionality

Management Options:

- Multiple user profiles
- Access scheduling
- Guest code generation
- Remote monitoring
- Activity history tracking

Connectivity:

- WiFi integration
- Bluetooth capability
- Smart home compatibility
- Mobile app control
- Voice assistant support

SMART SENSORS

Motion sensor

MOTION SENSOR

Motion sensors transform everyday automation by detecting movement and triggering customized responses throughout your home.

These smart sensors act as silent observers, automatically activating lights when you enter a room, or initiating personalized scenes for different times of day.

HIGHLIGHTS

Smart Features

- Lighting Control: Automatically illuminates pathways and rooms upon entry,
- Turns off lights in vacant areas
- Climate Response: Adjusts room temperature based on occupancy
- Smart Triggers: Activates morning routines, welcome sequences, or evening modes
- Energy Saving: Powers down devices in empty rooms

Technical Specifications

- Operating volt: AC 220-250v 50hz-60hz.
- Load power: upto 300/1200w max
- Ambient light: 3-2000 (adjustable)
- Load type: incandescent lamp, led light, clf, fans,
- Detecting distance: 0~7m
- Detecting angle: 360 degree.
- Installtion hight: 2.2-4 mtr
- Motion detetion speed: 0.6~1m/s
- Power cusumption:0.1w (static) & 0.4(work)
- Working humidity: less than 93%rh
- Delay: 10 seconds -7 minutes (adjustable)
